

Primeiro você precisa criar um perfil no OBS Studio

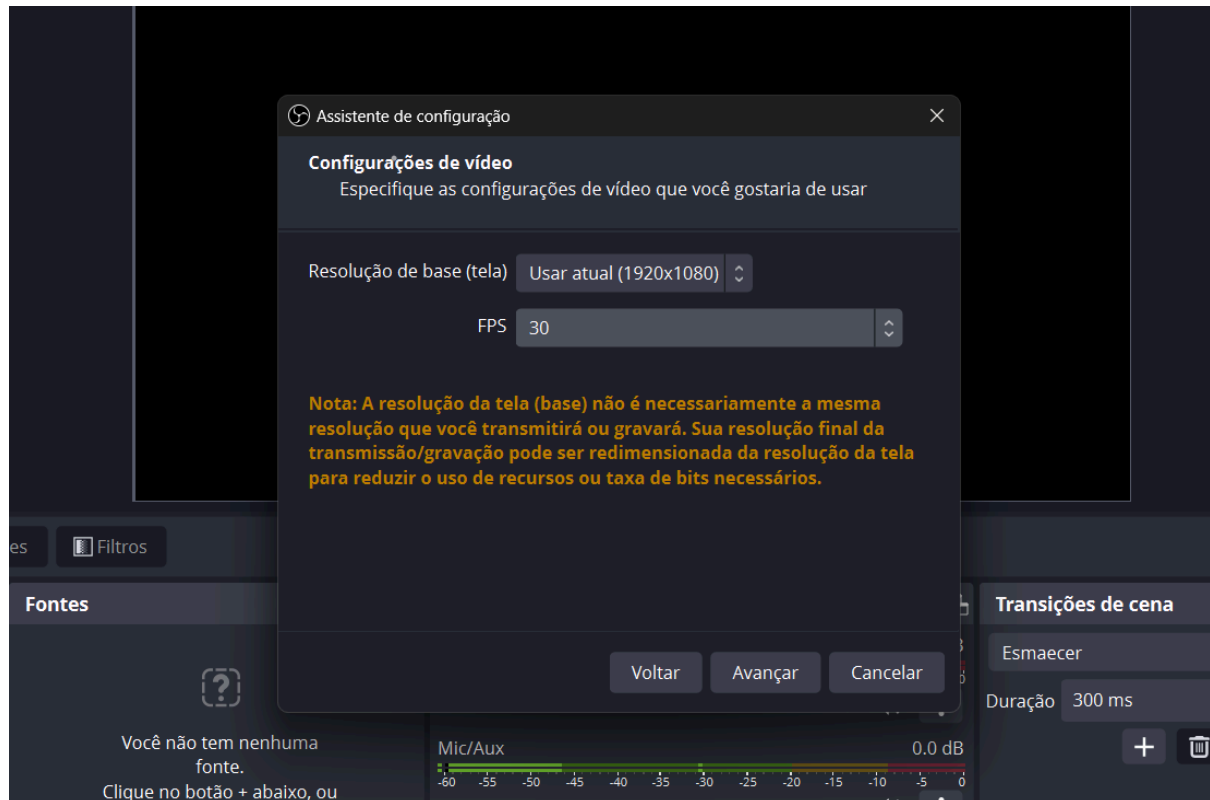

Nomear o perfil:

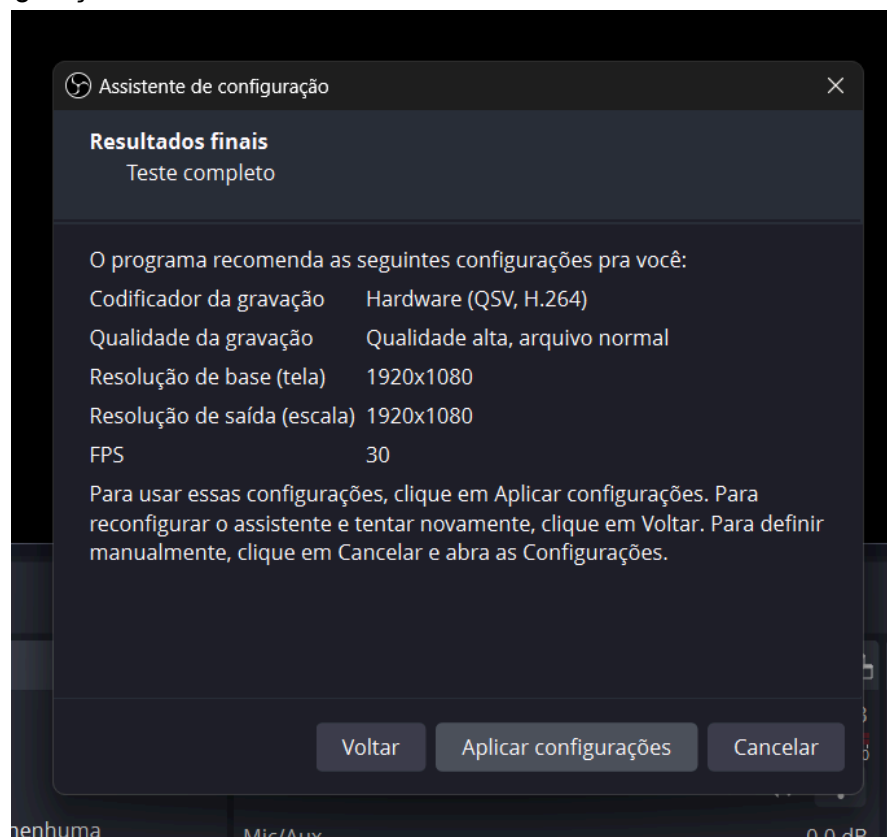

Selecionar essa opção:

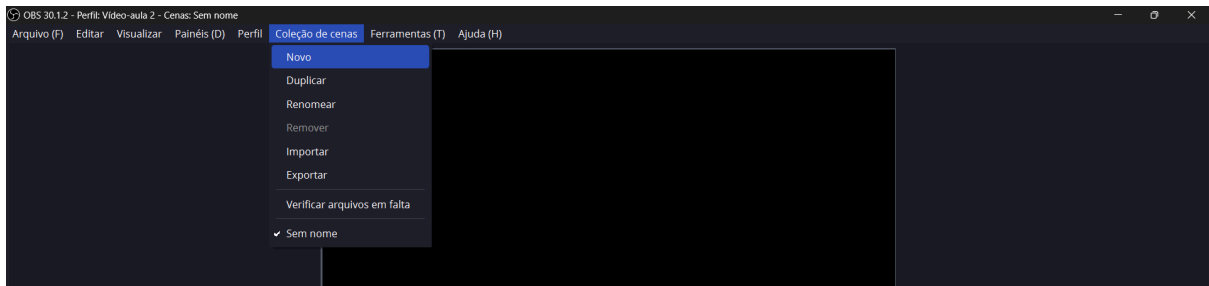

Definir os quadros (FPS) para 30 (o bastante para nosso vídeo):

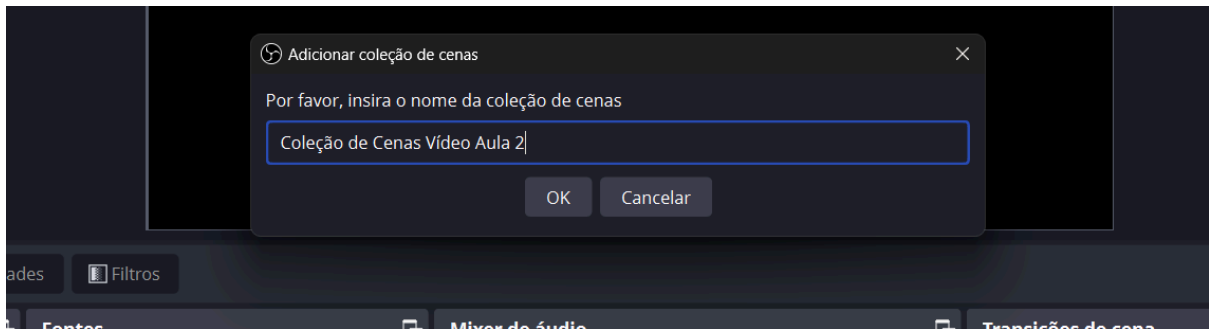

Aplicar configurações:

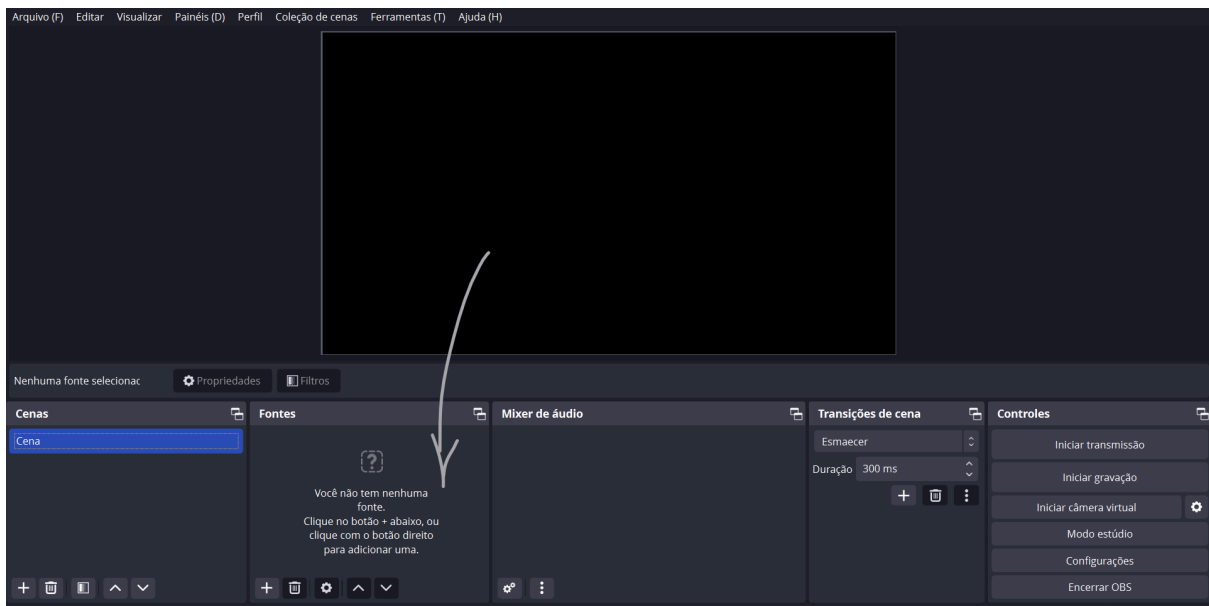

Adicionar Coleção de Cenas:

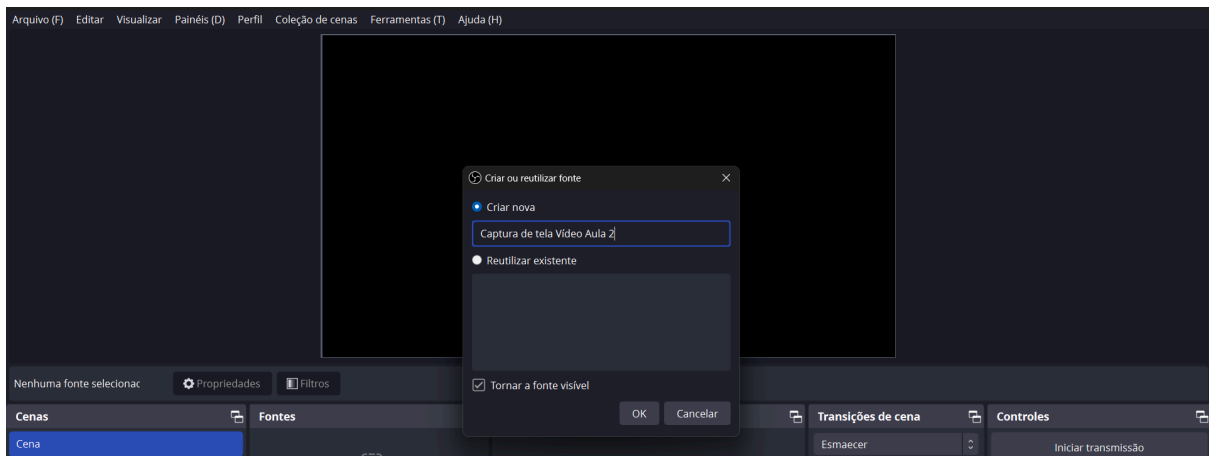

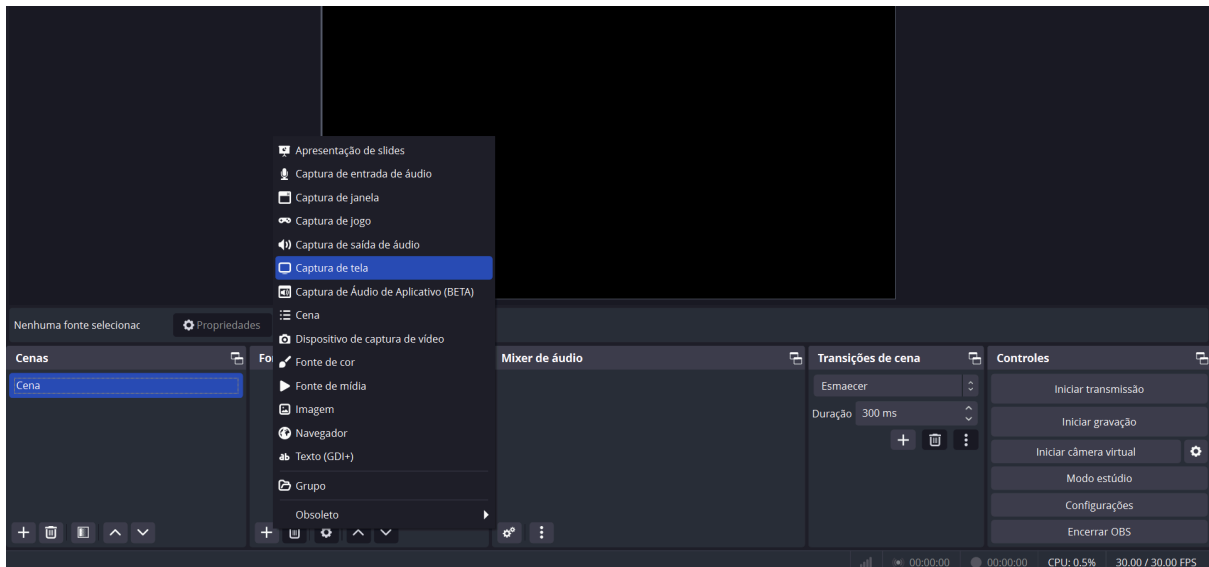

Nomear:

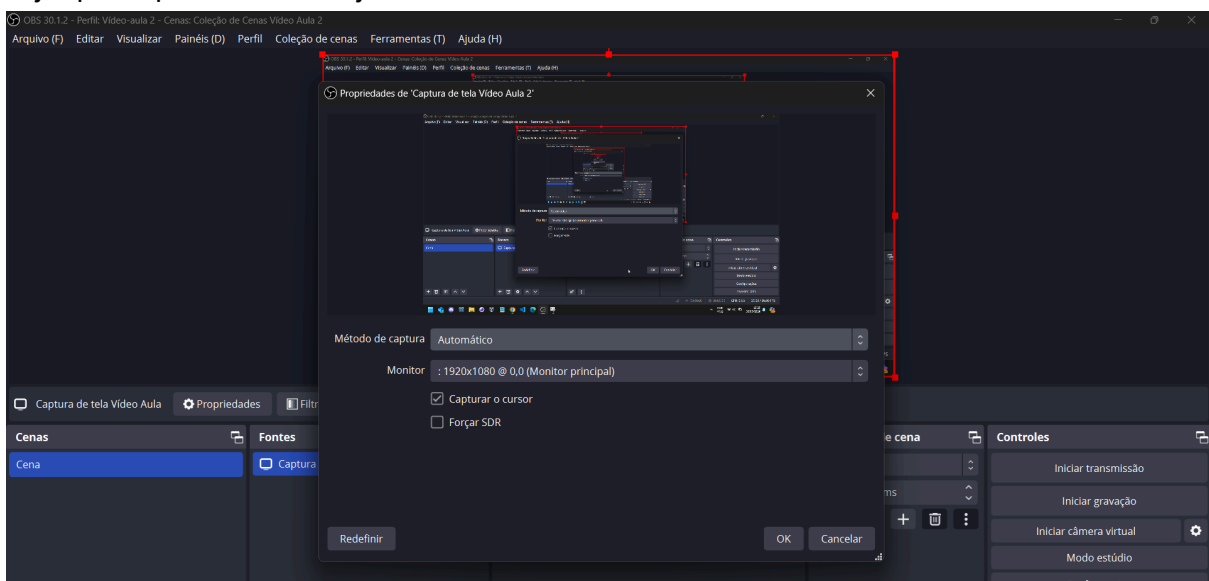

As fontes são as fontes de mídia que temos (tela, webcam, audio do computador)

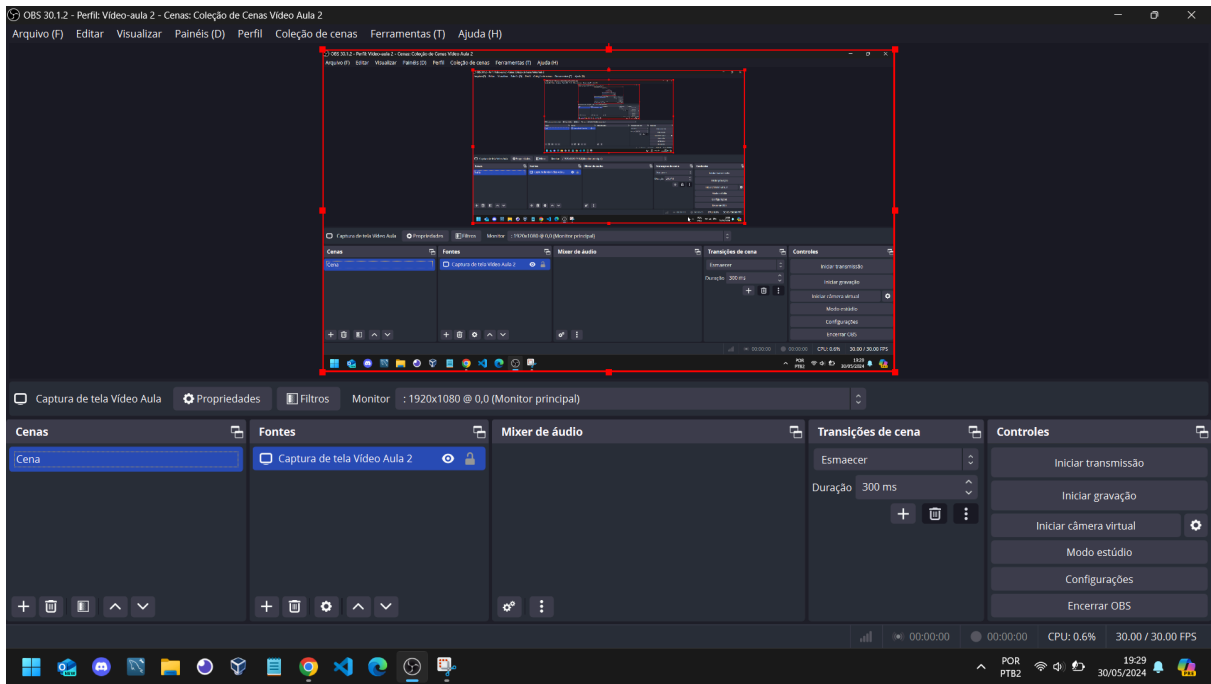

Adicione a tela do pc (ou seja, quero gravar a tela):

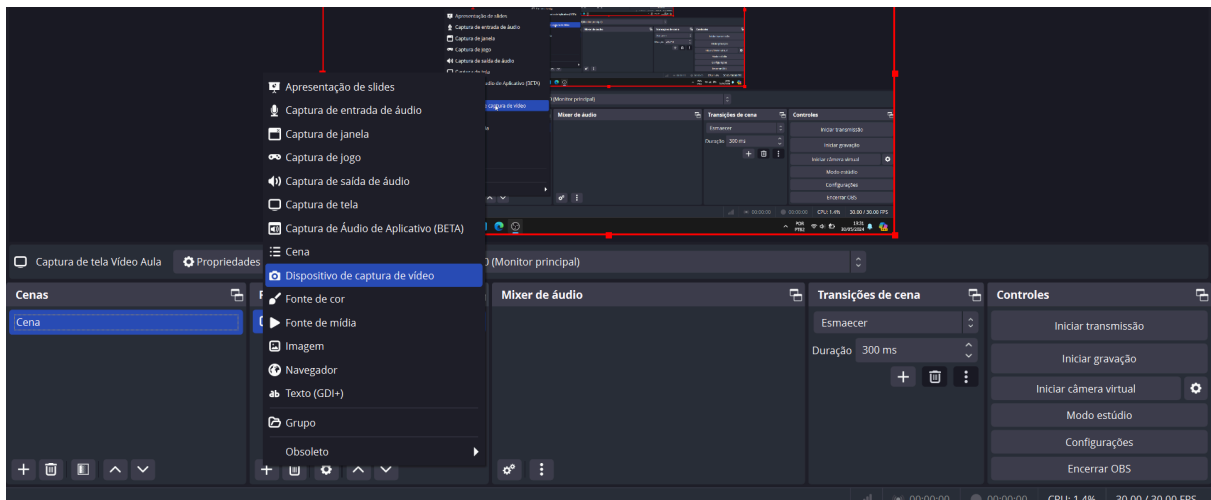

Veja que capturou sua tela já:

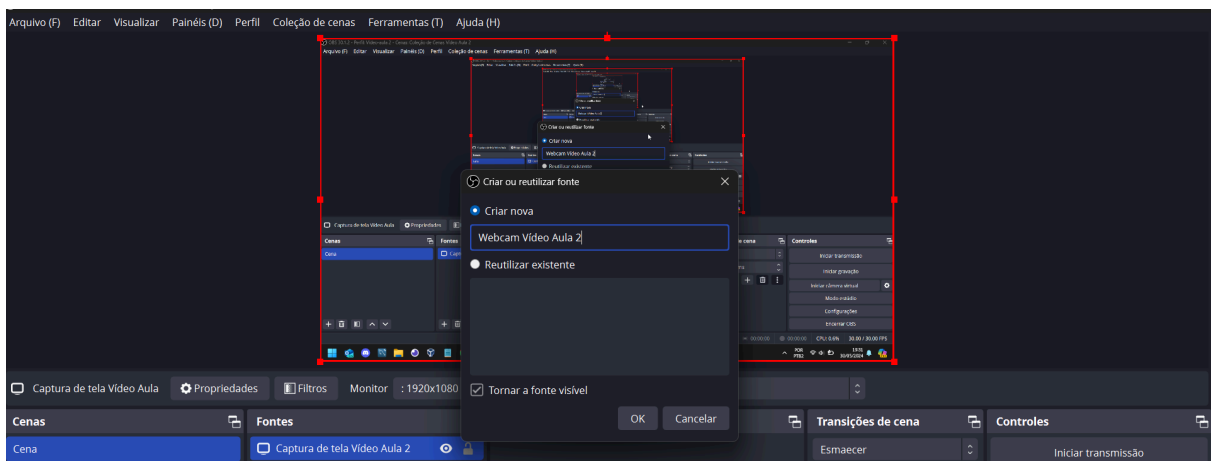

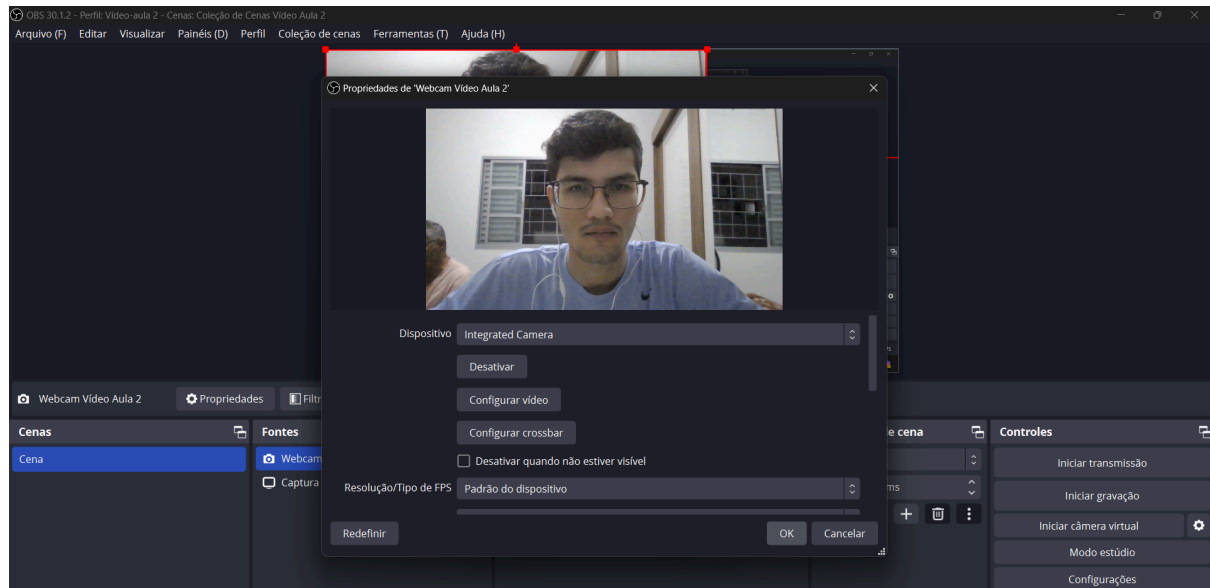

Para adicionar a webcam, vai nas fontes e adiciona:

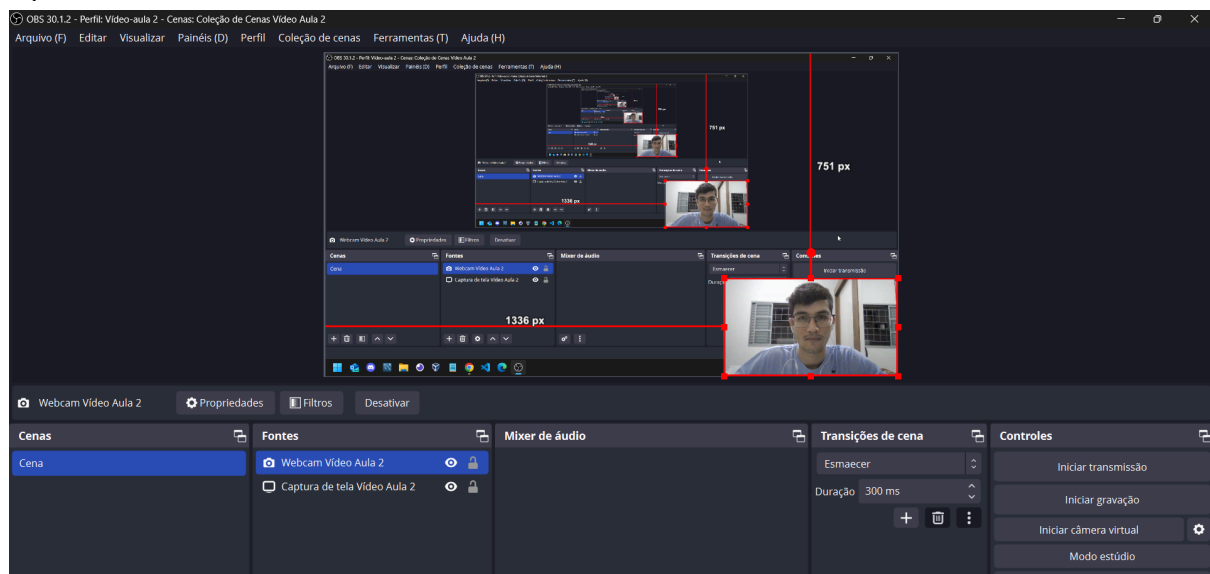

Nomeia e ao clicar em OK aparece sua câmera:

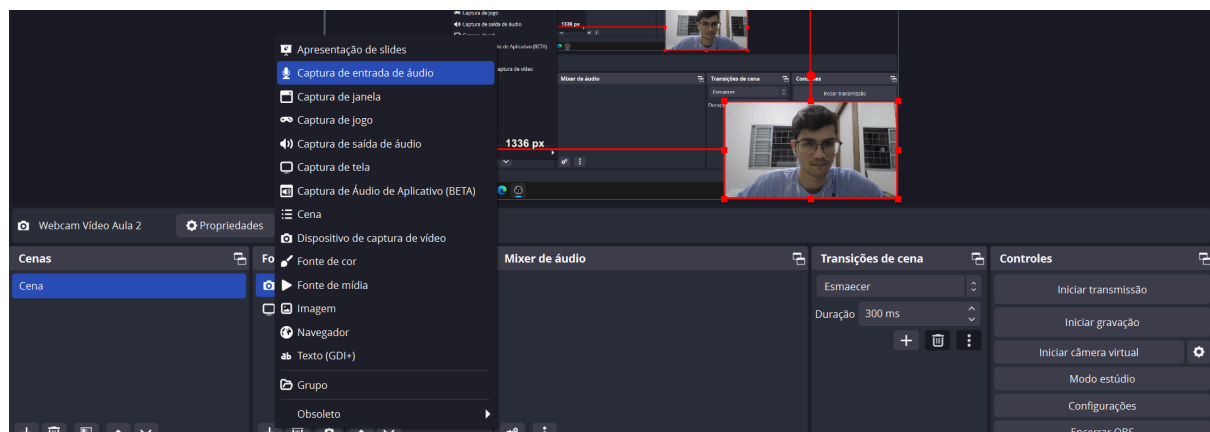

Clica em OK de novo:

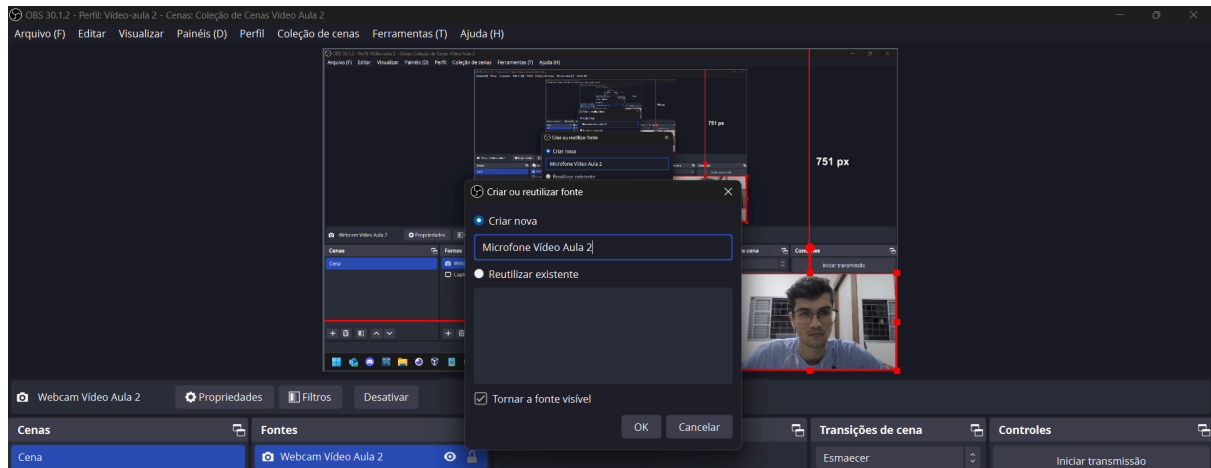

Pronto, a webcam vai ser adicionada. No caso, é só redimensionar o tamanho dela e reposicionar no canto inferior direito:

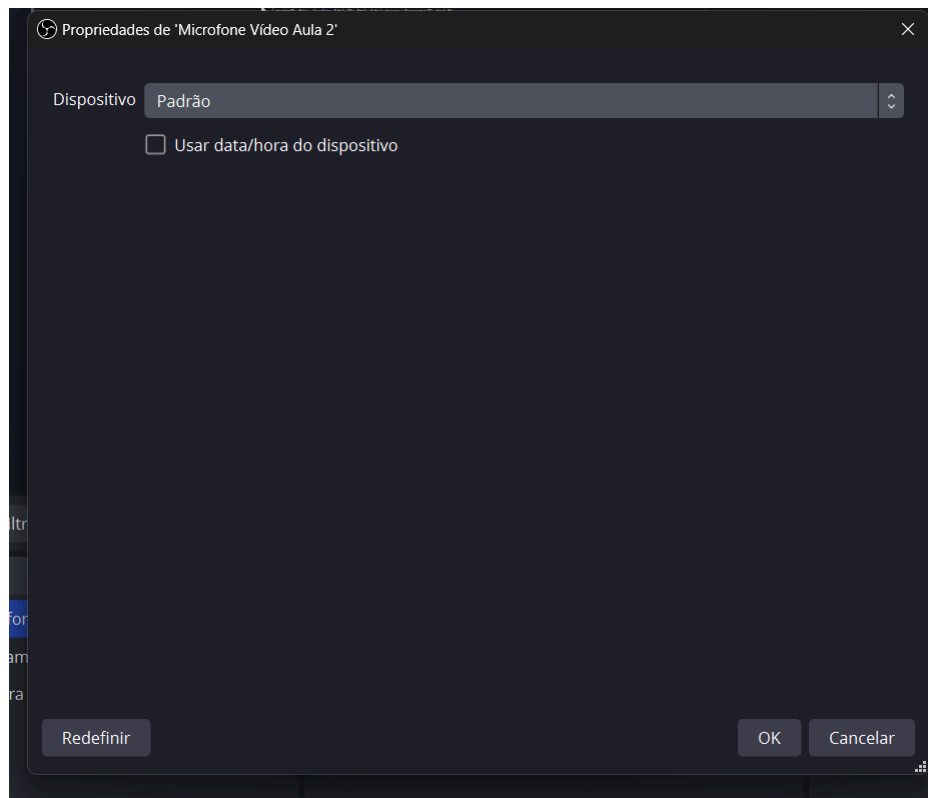

Para adicionar o áudio:

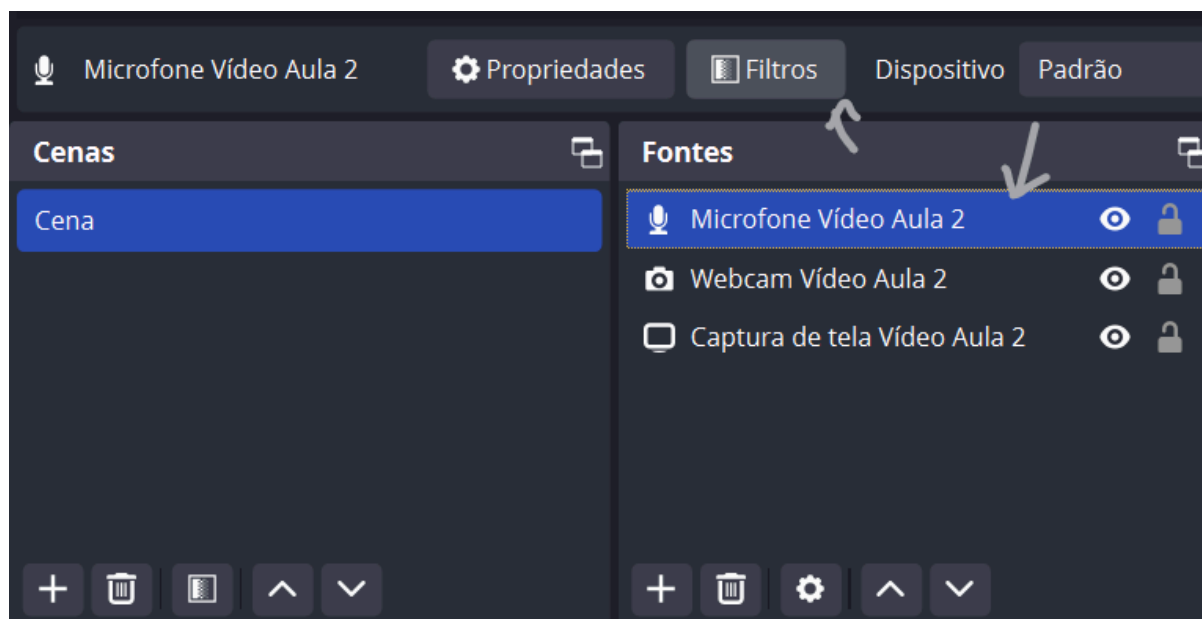

Nomear e OK:

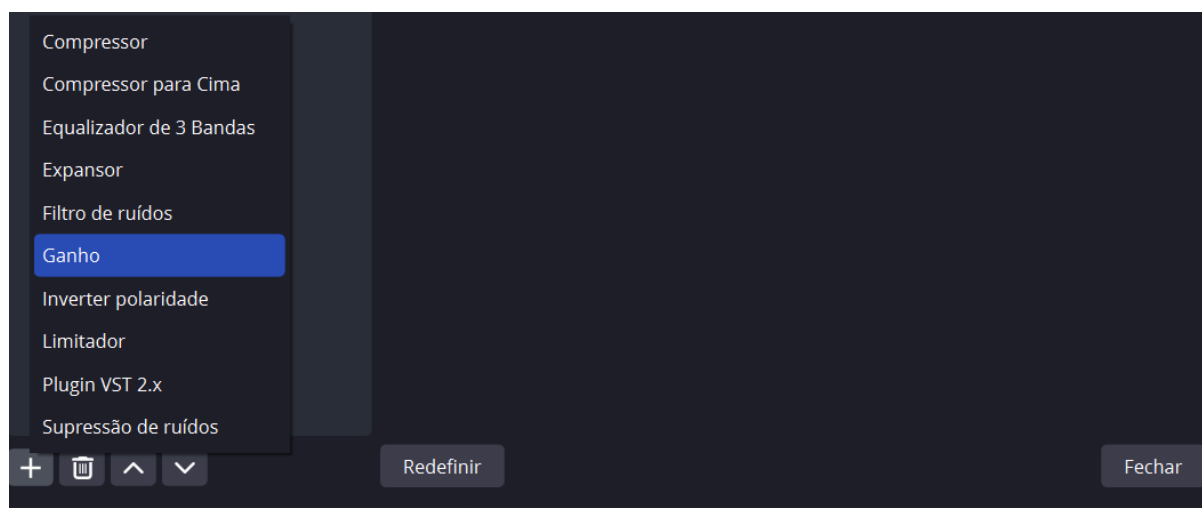

Selecione o padrão e OK:

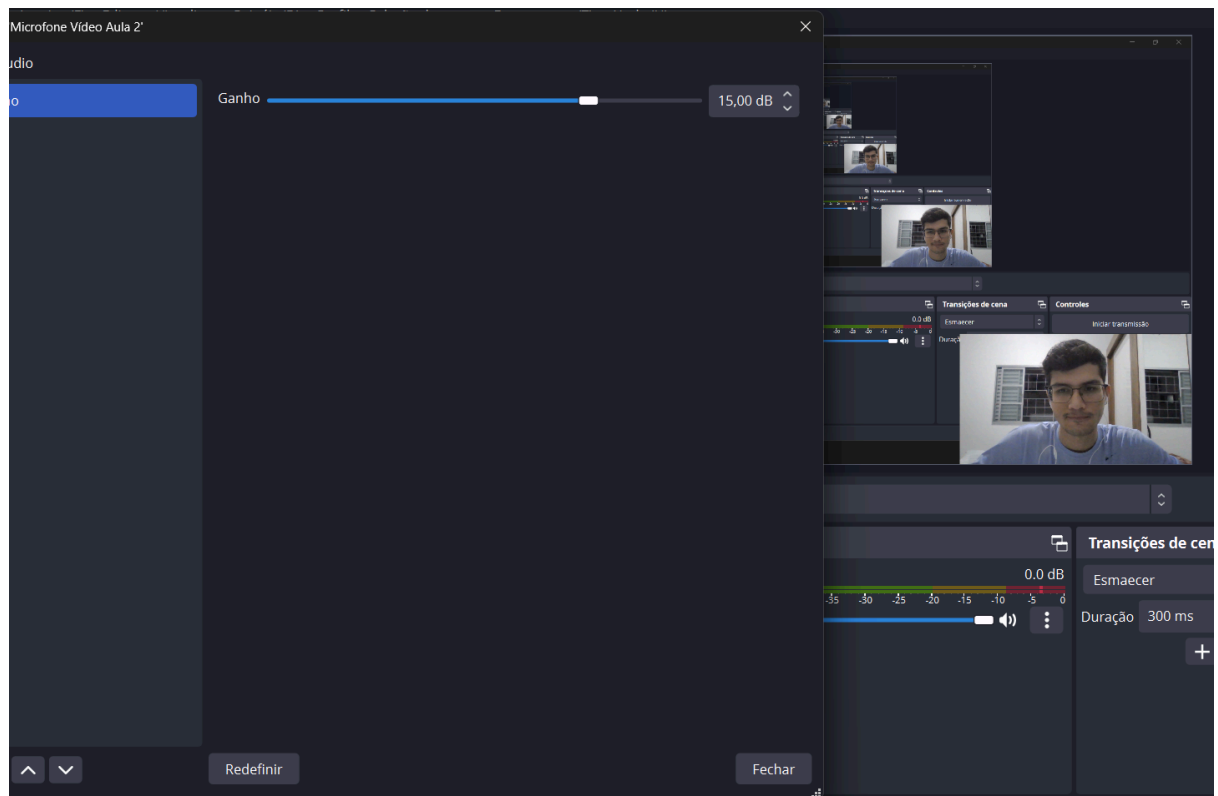

Configurando filtros (aumentar o áudio e abafar ruídos de fundo):

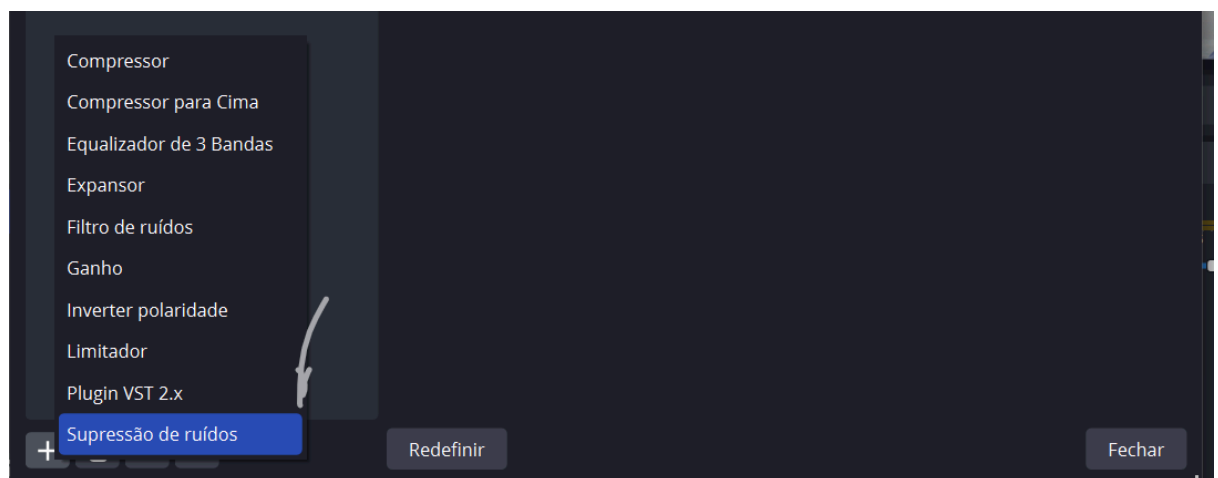

Selecione Ganho:

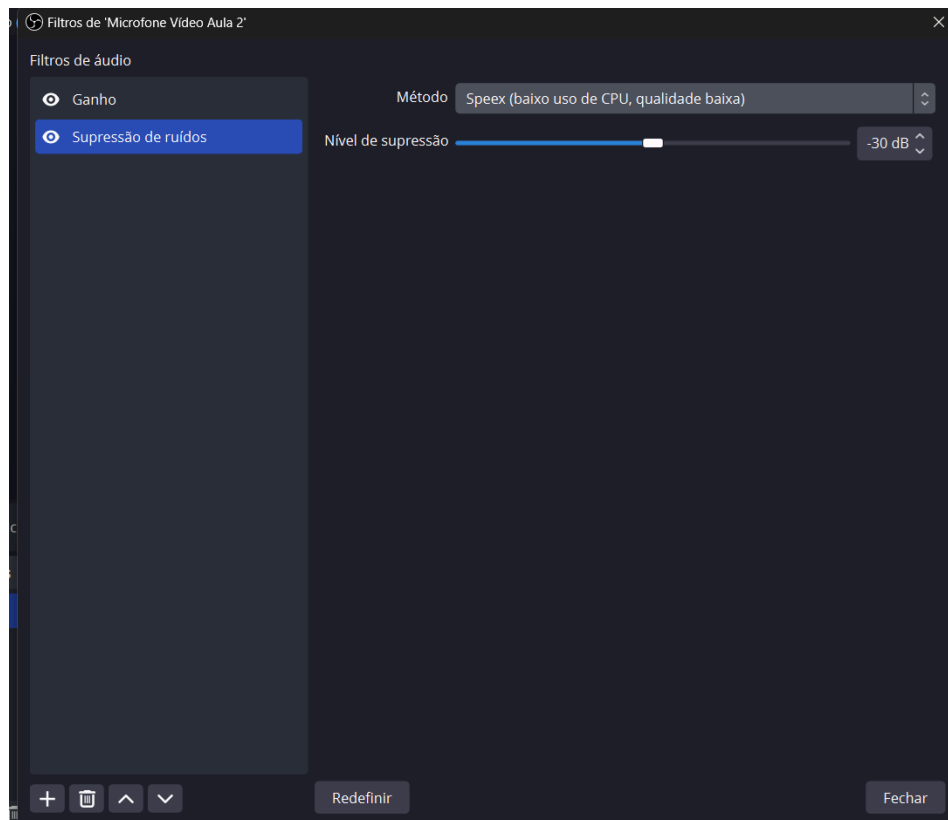

Colocar ganho até o som enviado bater no amarelo:

Para ruídos:

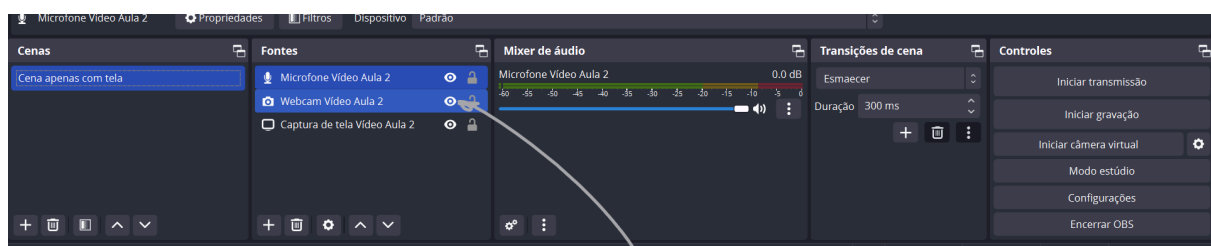

Pode deixar no Speex:

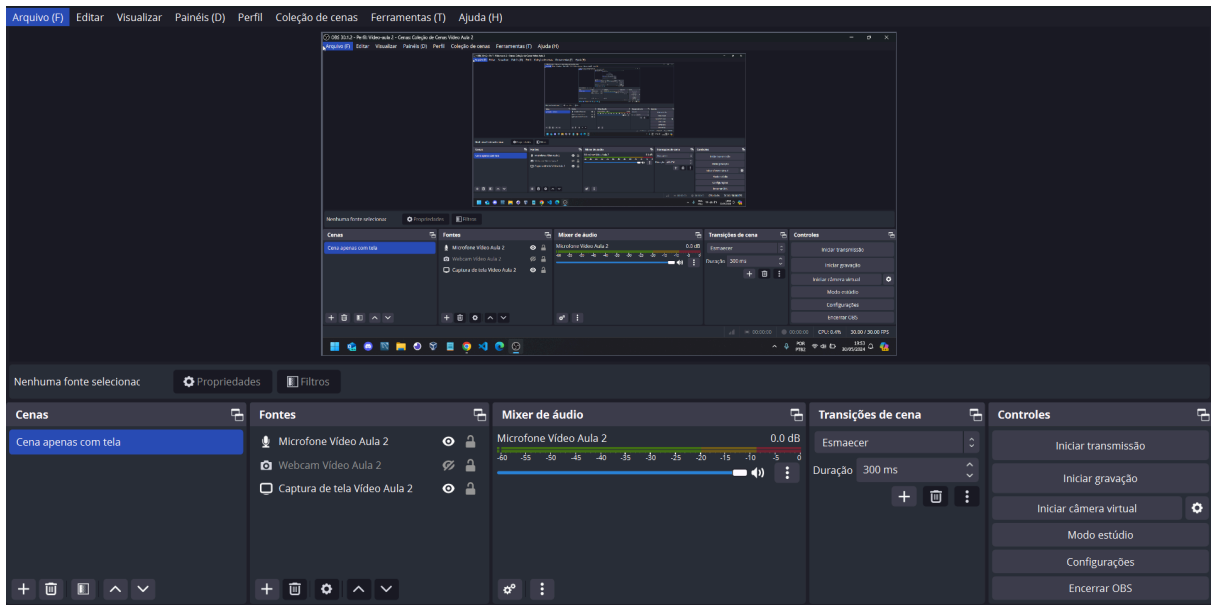

Agora vamos configurar nossas duas cenas: em uma, nossa webcam vai aparecer, na outra, apenas a tela do computador

Configurando cena onde temos apenas a tela

Renomeei a cena para “Cena Apenas com Tela” e cliquei no olhinho da webcam para fazer ela ficar oculta:

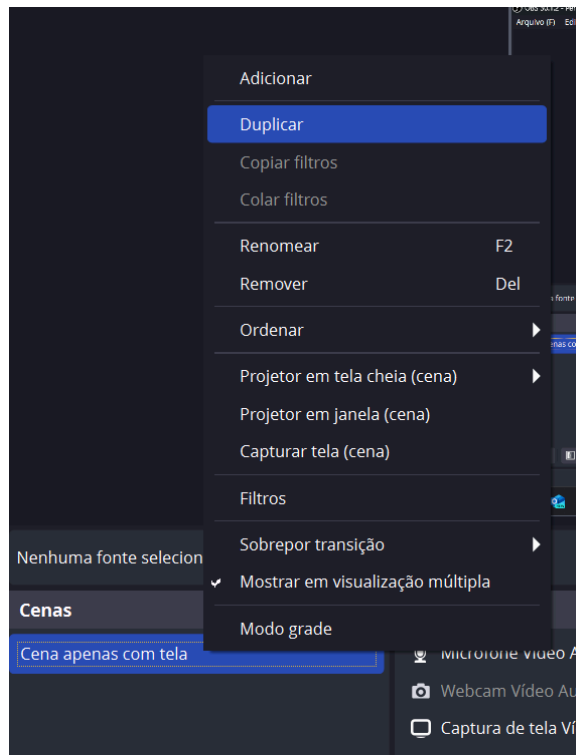

Pronto, apenas a tela aparece:

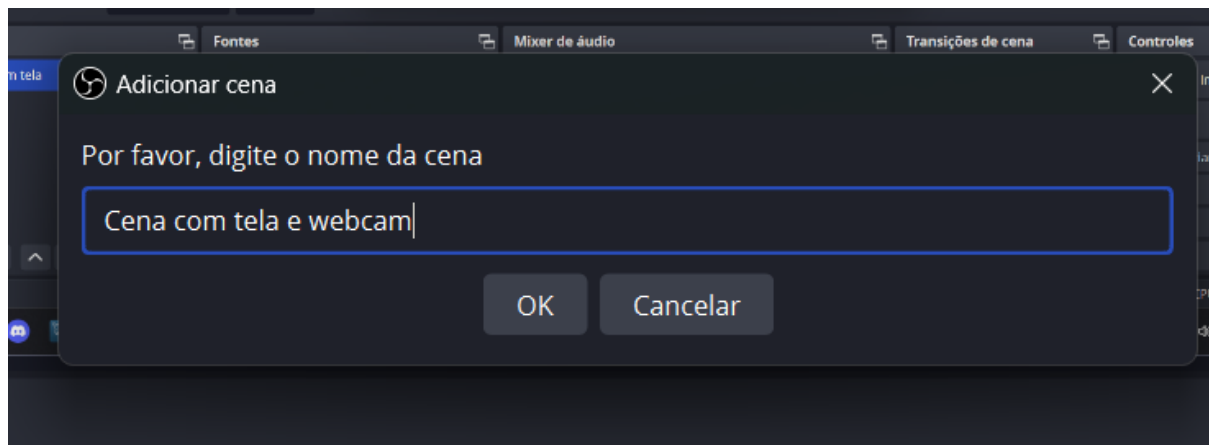

Configurando cena com tela e webcam

Agora vou configurar a cena com tela e webcam.

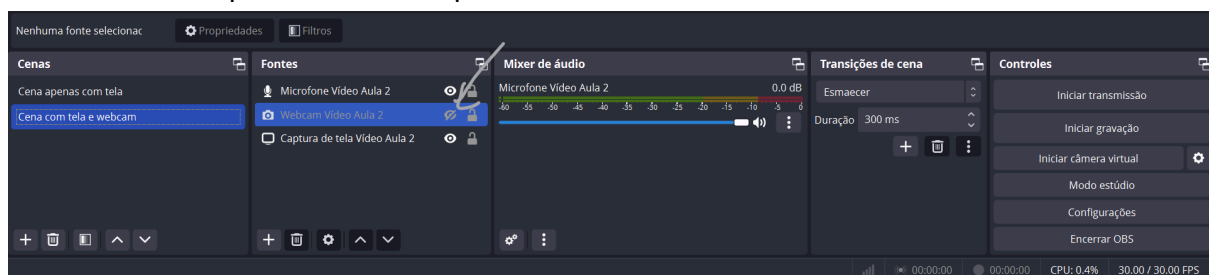

Vou primeiro duplicar a que já tenho:

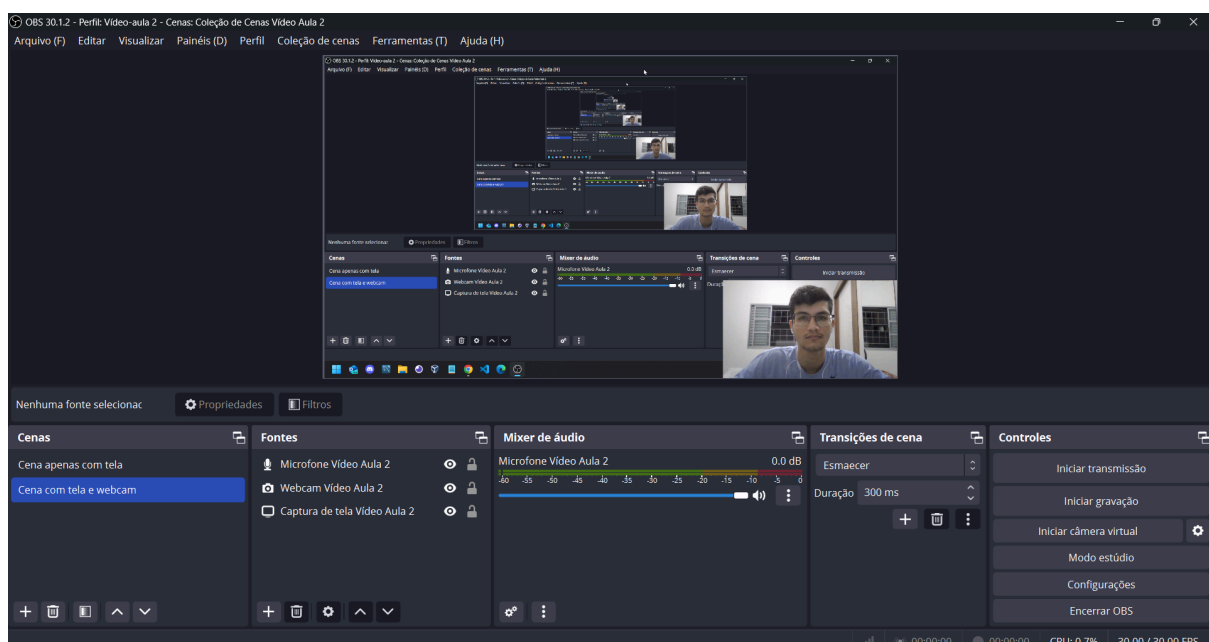

Renomeio:

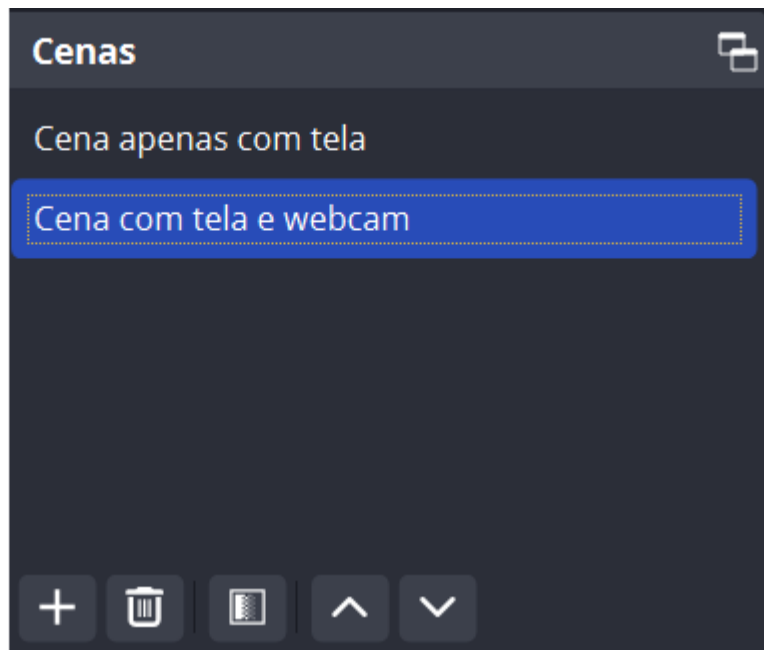

E ativo o olhinho para a webcam aparecer:

Pronto:

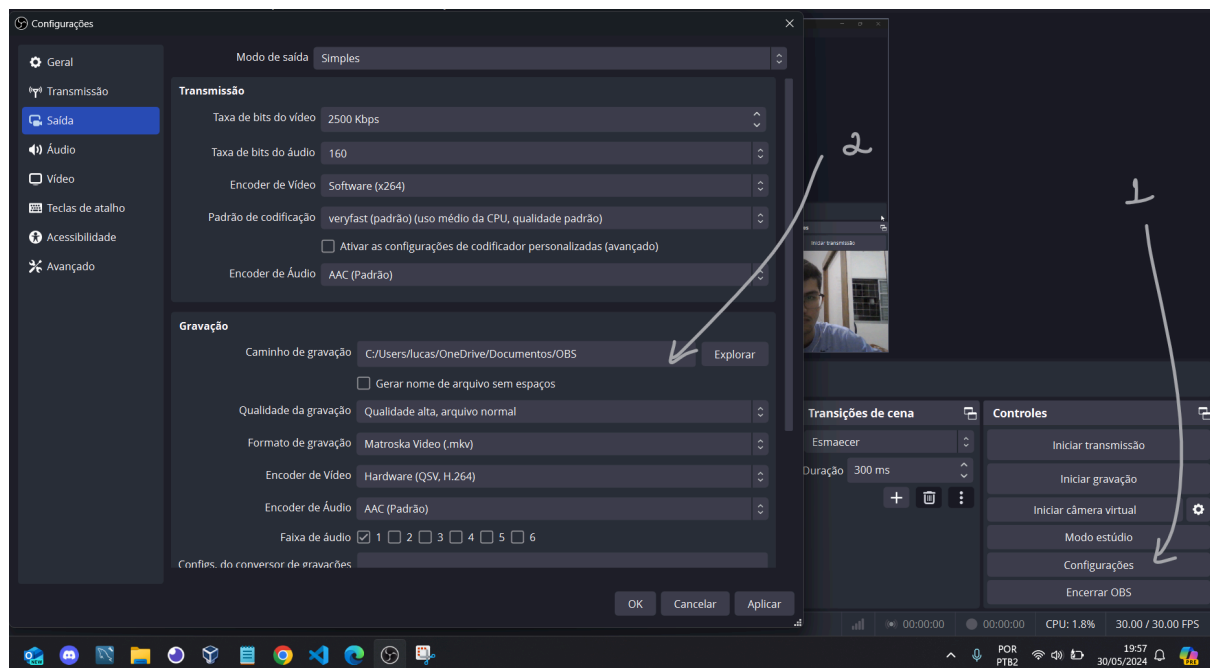

Agora podemos usar essas duas cenas em vídeo:

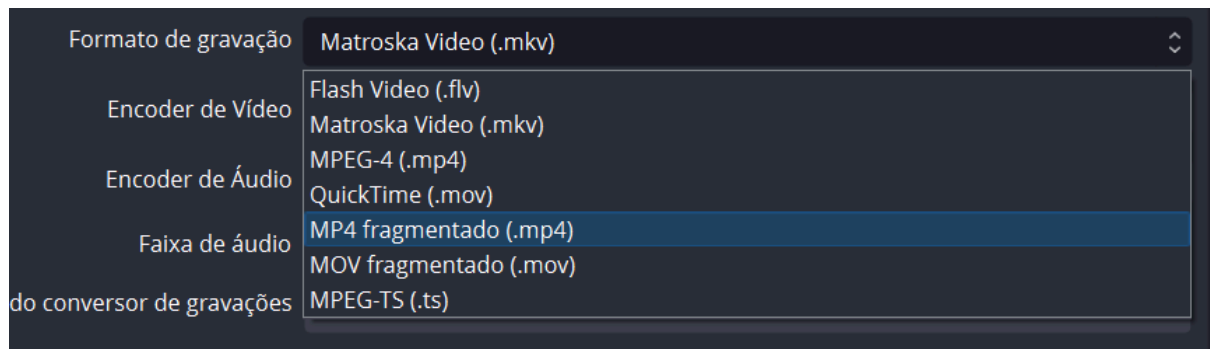

Demais configurações

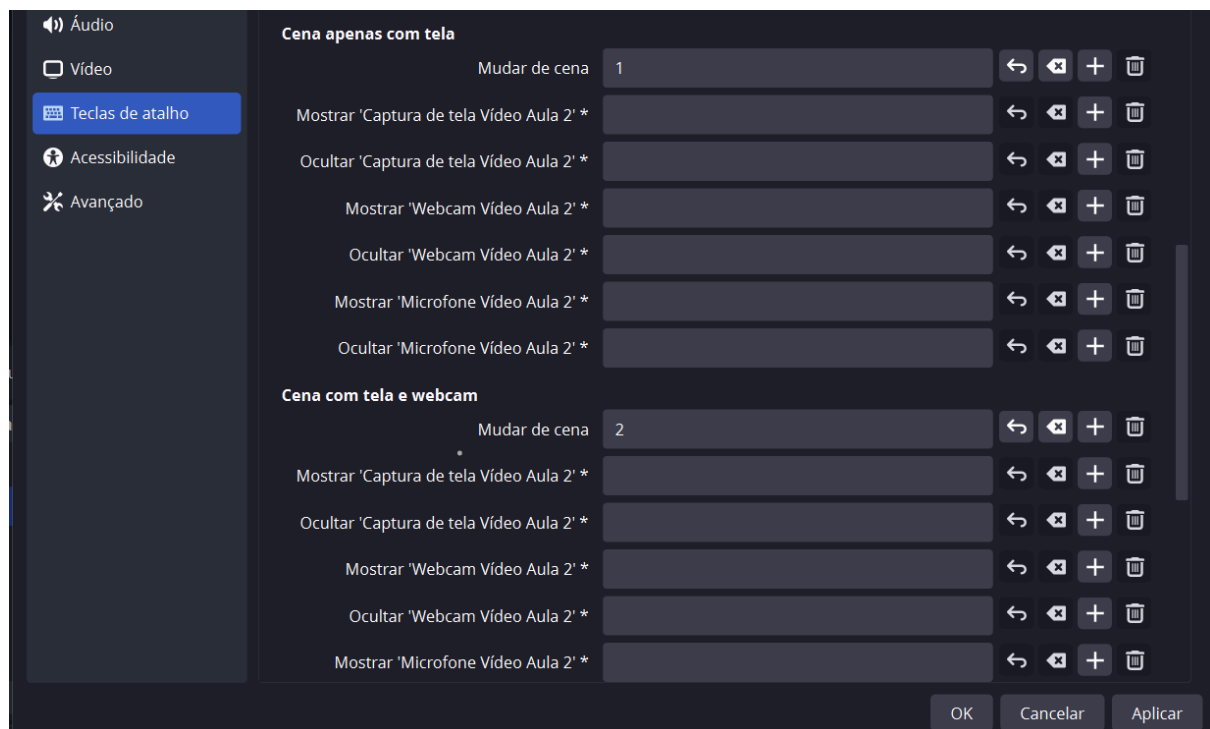

Caminho de salvamento:

Formato de gravar:

Configurando teclas de atalho:

Configurando saída de áudio do PC:
